

Ministry of Echology

Ministry of Echology is a 10 piece reggae/dub band from Lithuania.

The band has developed their own style, playing their sounds for dancing crowds around the Baltic States and spreading the love with their music with fat bassline, upbeat and horns.

The debut album "**Notes & Quotes**" has been released by Zona Music in April, 2014, followed by some crowded local shows and a tour to Poland, Germany and France.

Later that year Dubartis label came up with a follow up album of alternate versions. "**Version Excursion**" is an album full of dubs, versions and interpretations of songs by Ministry of Echology made by international producers.

In May 2015 the band dropped a runaway recording session at Big Jelly Studios (Ramsgate, UK). The resulting second studio album "**Wanderer**" by Ministry of Echology has been released in January, 2016:

A bunch of new original songs are also expected to be recorded and released as a third studio album, however... **Their power is in the dance floor. So turn up the speakers and be sure that you're invited to dance and have a good time with Ministry of Echology !** http://www.youtube.com/watch?v=hwZBAPwy_pY
